June 2025

News

GAP NOISE organized the Environmental course from 6th to 8th May. It took place in Universitat Autònoma de Barcelona (UAB) and with the support of our two Associate partners: Ajuntament de Barcelona and Ajuntament de Sabadell.

First day, doctoral candidates were in UAB for theory session and in the afternoon the move to Sabadell for practice session. Second day, they were in Barcelona city council facilities.

Afterwards, Doctoral candidates participated on a sound walk leaded by prof. Francesc Daumal.

On June 4-6, the second GAP NOISE Summer School was held at Siemens Industry Software, in Leuven, Belgium. The course included lectures by Siemens researchers on state of the art technologies for the automotive and electric drivetrain industry. The topics included transfer path analysis, virtual prototype assembly, machine learning, vehicle simulation and sound synthesis, component modelling and testing, structural dynamics and modal analysis. In addition to the lectures, the course provided an opportunity for the ten doctoral candidates to visit the research and testing facilities at Siemens.
